Dear Ms. Dortch:

On June 23, 2006, Peter Pitsch of Intel met with Barry Ohlson, senior legal advisor to Commissioner Jonathan Adelstein, regarding the above proceeding. In the course of the meeting, Mr. Pitsch expressed Intel's continuing support for the FCC's proposed rulemaking that would enable unlicensed use of the TV white spaces.

Mr. Pitsch stated that promulgating the rules could generate substantial consumer benefits from new wireless broadband devices,

especially in rural areas. He added that promulgating rules in advance of their effective date would give manufacturers the necessary lead time to design products for use at the effective date. He also observed that the ability of smart radios to sense their environment meant that they could operate before completion of the DTV transition without creating broadcast interference.

Pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, a copy of this submission is being provided to each of the above parties. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

/s/ Peter K. Pitsch

Peter K. Pitsch
Intel Corporation
Director, Communications Policy
